

Smart furniture manufacturing

a “new world” demands “new thinking”

What is Re-manufacturing?

“returning an used product to at least its original performance with a warranty that is equivalent to or better than that of the newly manufactured product”

Current project initiatives in BSR region

- Manufacturing + Design:
 - comfort in living (active ageing in Europe);
 - comfort at work (longer at work);

Our Project Idea:

GREEN MANUFACTURING OR RE-MANUFACTURING FOR CONTRACT FURNITURE INDUSTRY

Green manufacturing or Re-manufacturing for contract industry (I)

- Europe is the **largest tourism destination** in the world with a market share of around **50 %**
- **475 million** international arrivals every year
- People spending **over 1.5 billion** nights in hotels in the EU28

Green manufacturing or Re-manufacturing for contract industry (II)

Why the hotels need to renovate?

- Keeping up to required quality standards
- Marketing tactics
- Basic necessities

Re-manufacturing & EU strategy for WFI (V)

The main technological challenges for the EU F-BI are:

- How to innovate and develop new products and services to meet rapidly changing societal needs, including up to 2020, 2030 and 2050?
- How to design and develop new production processes that use less wood, other raw materials and energy, while minimising waste, and are capable of manufacturing completely new groups of products?

Re-manufacturing & EU strategy for WFI (VI)

The main technological challenges for the EU F-BI are:

- How to educate and update the knowledge and skills of the F-BI's researchers and workforces to be able to develop such products and implement such processes?
- How to produce wood more cost-effectively and sustainably from existing EU forests and other wooded land in qualities and assortments better matched to manufacturing needs?

Is furniture suitable for re-manufacture?

<i>Beneficial Features</i>	<i>Detrimental Features</i>
High intrinsic value	Poor design for assembly/disassembly
Good durability	Proliferation of materials in construction
Low to moderate technological evolution	Status-dependent, fashionable items
Core readily available	Poor perception of standards/branding
Integrated sales/service/upgrade options	Low price of new goods
Design information available	Craft skill shortage
